# Reinhausen –

# Energy for the future!

At a global market leader in energy technology, you can take an active part in maintaining a stable energy supply in the future. You will help shape the energy transition by advancing our intelligent solutions. Become part of a global team of 3,700 dedicated colleagues and discover the one-of-a-kind solidarity of our family-led corporate group. Take a stand and make the future of energy technology your future as well!

# Make an impact, learn your value

In order to face the major challenges in the energy supply purposefully and efficiently, as well as with motivation and joy, we are looking for employees who are a good match:

## You

- ... have the desire to make an important contribution to society with your work.
- ... build on interdisciplinary collaboration with experts from different fields and numerous countries.
- ... appreciate a great sense of togetherness with mutual support.

## We

- ... are a strong partner. As a global market leader in energy technology, we give you the best preparation for your professional future.
- ... offer you stability and security in a future-oriented industry. Together, we can shape the energy supply of tomorrow.
- ... are a family company that supports a family-friendly work environment with numerous services.
- ... are a dedicated team of experienced experts and highly motivated newcomers

who work together on an equal footing in flat hierarchies.

... have remained a family company, despite our size. Here, even „newbies“ quickly take on responsibility.

... offer you the state-of-the-art working environment of a global market leader – from collaboration with specialists on all continents to support for further training.

## **Broadly based – our professional fields**

In order to develop innovative solutions for future issues, such as the energy transition, safeguarding the electricity supply, sustainability, and digitalization, we need professionals and graduates in a variety of professional fields:

- Technical Service: Maintenance, servicing and repair of tap changers and transformers for utilities and industrial customers worldwide
- Electrical Engineering: Development and testing of new elements as well as the implementation and monitoring of products and solutions for energy systems
- Power Electronics: Development of power-electronic systems, solutions and platforms for applications in electrical grids
- Business Development: Further development of the company through the

## **Your benefits**

Exciting and meaningful tasks:

We guarantee a stable energy supply for households and industry – help us design the future of energy technology and shape the energy transition!

There is also a lot of energy on our

- creation of forecasts of future trends, including outside the industry, as well as the further development of existing and opening up of new business fields, etc.
- Technical Sales: Understanding of the wide-ranging needs of different customers and support in developing the optimal solution for every challenge
  - IT: Maintenance and new development of cross-platform software and the latest technologies for our digital solutions
  - Furthermore, we are always looking for dedicated employees in many other professional fields, such as Production, Administration, Logistics, etc.

## Present on every continent

The Reinhausen Group offers many jobs within Germany and abroad. The majority of our approx. 3,700 employees around the world work at our headquarters in Regensburg.
